

CLIFTON HILL **ESTATE.**

INFORMATION FOR THE BUILDING OF A POOL

Protocol to be followed with **pool building** plans is as follows:

- An Engineer is required to approve these plans, we can recommend Jim Woodward of Ellison Woodward Associates cc, Consulting Engineers, contact number: 031 764 2894, to pre-approve and scrutinize all plans before submission to the CHHOA for approval
- Once the Consulting Engineer has given his approval, these plans are sent to the Estate Admin office for CHHOA approval
- Any boundary issues or relaxation issues are referred to the affected neighbour(s) for their consent
- If neighbor(s) consent is not given, we as the CHHOA cannot overturn this decision nor can the Owner bypass the HOA, and send plans to council for approval, as these will be rejected without the CHHOA's approval stamp, letter and signatures.
- Once the CHHOA and Municipal approved plans have been received back into the Admin Office, the Owner (a.k.a. the Employer), his builder, and the Estate Manager will meet to discuss and sign the Builders Protocol, which gives in detail the way forward with regard to verge deposits, building levies, behaviour of contractors' employees, times and conditions of work, etc.
- Screening of the build site, mobile toilets, must be put in place if required, and instruction given to all contracted employees as to their expected behaviour when on the Estate.
- Once payment of the necessary deposits and permits has been received, and Access Permits have been made for all the bona fide employees (showing their I.D.'s, names, etc.), then the building of the pool may go-ahead.

Thank you for your attention to all of the above information. Please address any queries to the Estate Manager, on 031 762 1725 or 082 883 4327.

Kind regards,
Management

CLIFTON HILL ESTATE, P.O. Box 522, Hillcrest, 3652.
